Getting Started

Logging In

Navigate to the application URL and sign in using one of two methods:

- **Email & Password** — Enter your email and password, then click **Login**.
- **Google OAuth** — Click **Sign in with Google** to authenticate with your Google account.

If your account has no role assigned, you will see a warning banner on the dashboard:

"Your account does not have a role assigned yet. Please contact your administrator to get access."

Navigation

The sidebar on the left provides access to all features. The items visible depend on your role:

Section	Menu Item	Visible To
—	Dashboard	Everyone
Manage	Projects	Everyone
Manage	Tasks	Internal + Vendor
Time & Billing	Time Tracking	Internal + Vendor
Time & Billing	Timesheets	Internal + Vendor
Time & Billing	Invoices	Everyone
Time & Billing	Financials	Admin, Super Admin, AM, PM
Time & Billing	Reports	Admin, Super Admin, AM, PM
Admin	Admin	Admin, Super Admin

Your user profile is displayed at the bottom of the sidebar, showing your name, job title, email, and user type (Internal, Vendor, or Client). Click **Edit profile** to go to your profile page.

PM Tool has three user types and eight roles:

Internal Users

Role	Description
Super Admin	Full system access including admin panel and all management features
Admin	Full system access including admin panel and all management features
Account Manager (AM)	Manages client relationships, projects, invoices, financials, and reports
Project Manager (PM)	Manages projects, tasks, timesheets, invoices, financials, and reports
Team Member	Works on assigned tasks, logs time, submits timesheets

Vendor Users

Role	Description
Contractor	Logs time, submits timesheets, views assigned projects
Vendor Contact	Manages vendor relationship, submits project requests and vendor invoices

Client Users

Role	Description
Client	Views own projects, reviews and approves/declines project proposals, reviews and approves invoices

Permission Summary

Action	Super Admin	Admin	AM	PM	Team Member	Contractor
Create/Edit/Delete Projects	✓	✓	✓	✓	—	—
Create/Edit/Delete Milestones	✓	✓	✓	✓	—	—
Create/Edit/Delete Tasks	Any project	Any project	Any project	Any project	Assigned projects only	Assigned projects only
Log Time	✓	✓	✓	✓	✓	✓
Submit Timesheets	✓	✓	✓	✓	✓	✓
Approve/Reject Timesheets	✓	✓	✓	✓	—	—
Create Client Invoices	✓	✓	✓	✓	—	—
Create Vendor Invoices	—	—	—	—	—	—
Approve Invoices	✓	✓	✓	—	—	—
Send / Revise Project Proposals	✓	✓	✓	✓	—	—
Approve/Decline/Request Revision on Proposals	✓	✓	✓	✓	—	—
Raise Change Requests	✓	✓	✓	✓	—	—
Approve/Decline/Request Revision on Change Requests	✓	✓	✓	✓	—	—
View Financials	✓	✓	✓	✓	—	—
View Reports	✓	✓	✓	✓	—	—
Admin Panel	✓	✓	—	—	—	—

Each role sees a customized dashboard after login.

Account Manager / Admin / Super Admin Dashboard

- **Stat Cards:** Total Projects, Active Projects, Total Clients, Total Contract Value
- **Revenue Pipeline:** Total Billed, Collected, Outstanding amounts with badges for pending quotes and approvals
- **Portfolio by Client:** Table showing each client's project count, active projects, and contract value
- **Invoices Requiring Action:** List of invoices that need review with status badges
- **Pending Vendor Quotes:** Quotes awaiting approval with Approve/Reject actions
- **Projects by Status:** Breakdown of projects by their current status

Project Manager Dashboard

- **Stat Cards:** My Projects, Active, Tasks Due This Week, Pending Timesheets
- **Pending Vendor Project Requests:** Vendor-submitted project requests with Approve/Reject buttons
- **My Projects:** List of assigned projects with health indicators (On Track, At Risk, Delayed)
- **Task Distribution:** Breakdown of tasks by status (To Do, In Progress, Review, Done)
- **Pending Quotes:** Vendor quotes awaiting review

Vendor Dashboard

- **Vendor Info Card:** Vendor name, contact details, project count
- **Metric Cards:** Total Contract Value, Invoiced, Paid, Outstanding
- **Active Projects:** List of current projects with status and health indicators
- **Quotes:** Manage vendor quotes (create, submit, delete) with status tracking (Pending, Submitted, Approved, Rejected)
- **Recent Invoices:** Latest vendor invoices with status

Client Dashboard

- **Billing Summary:** Contracted, Invoiced, Paid, Outstanding amounts

- **My Projects:** Grid of project cards showing status, approval status, task progress bar, PM/AM assignments, and due dates
- **Recent Invoices:** Table of latest invoices with status badges
- **Project Timeline:** Overview of active project milestones

Team Member / Generic Dashboard

- **Stat Cards:** Active Projects, Open Tasks, Pending Timesheets, Hours This Week, Outstanding Invoices
- **Recent Projects:** Quick links to projects with task counts
- **Recent Invoices:** Table of recent invoices with status

Access via **Projects** in the sidebar.

Tabs (vary by role)

Internal Users — 4 tabs

1. **My Projects** — Projects you are assigned to (as PM, AM, or team member)
2. **All Projects** — All projects in the system with filters for PM, AM, Client, and Vendor
3. **Vendor Requests** — Project requests submitted by vendors awaiting approval
4. **Archived Projects** — Projects with ARCHIVED status

Vendor Users — 3 tabs

1. **Current Projects** — Active projects assigned to your vendor
2. **My Requests** — Project requests you have submitted with approval status
3. **Archived Projects** — Archived vendor projects

Client Users — 1 tab

1. **My Projects** — Projects associated with your organization

Creating a Project

Click + **Create** (top right). Fill in the project form:

Field	Required	Description
Name	Yes	Project name
Category	No	Project category
Description	No	Project details
Status	No	DRAFT, ACTIVE, ON_HOLD, COMPLETED, CANCELLED, ARCHIVED
Project Type	No	INTERNAL or other types
Priority	No	LOW, MEDIUM, HIGH, URGENT
Billing Method	No	Time & Materials, Fixed, Milestone, Mixed
Risk Level	No	Project risk assessment
Client	No	Assign a client organization
Vendor	No	Assign a vendor organization
Project Manager	No	Assign a PM
Account Manager	No	Assign an AM
Team Members	No	Multi-select team members
Start Date	No	Project start date
End Date	No	Project end date
Proposed Cost	No	Estimated project cost
Estimated Hours	No	Estimated total hours
Proposed Workers	No	Number of workers needed
Required Skill Set	No	Skills required

Use **Save as Draft** to save without making it active, or **Save** to create the project.

Vendor Project Requests

Vendors can submit project requests by clicking **+ New Request**. The request form includes: Name, Category, Description, Start/End Date, Proposed Workers, Required Skill Set, Billing Method, Estimated Cost, and Estimated Hours.

Requests can be saved as draft or submitted. Once submitted, PM/AM/Admin users can **Approve** or **Reject** the request from the Vendor Requests tab or their dashboard.

Client Proposal Workflow

For any project with a client assigned, scope and billing terms must be proposed to and approved by the client before the project becomes active. This is separate from Vendor Project Requests above — it governs client sign-off on cost, not a vendor's request to work on a project.

1. **Build the proposal** (PM, AM, Admin, Super Admin) — set the project's Billing Method, Estimated Cost, Estimated Hours, and, for Time & Materials or Mixed billing, an **Hourly Rate**. Add milestones with a **Contracted Amount** for Milestone or Mixed billing.
2. **Send Proposal** — from the project detail page, click **Send Proposal**. The client receives an email notification. Sending is blocked with an error if an hourly rate is required but not set.
3. **Client reviews** — the client opens the project and sees a Proposal panel where they can **Approve**, **Decline** (with a required reason), or **Request Revision** (with notes).
4. **On approval** — the project automatically moves to ACTIVE status, and the Billing Method, Estimated Cost, Estimated Hours, Hourly Rate, and each milestone's Contracted Amount, Name, and Due Date all become locked — they cannot be edited further.
5. **Starting a new revision** — PM/AM/Admin can click **Start New Revision** to unlock these fields again and bump the proposal version, then edit and resend for approval.

Proposal statuses: DRAFT → SENT → APPROVED / DECLINED / REVISION_REQUESTED. From any of the latter three, starting a new revision returns the proposal to DRAFT with the version number incremented.

A client can only view and act on proposals for projects belonging to their own organization.

Proposal History: Every time a proposal is sent, a permanent snapshot of the terms and milestones at that moment is recorded, along with the client's response and any comment. Click **View History** next to the version badge to open a timeline of every past version — what was sent, who sent it, how the client responded, and any decline reason or revision note. Nothing is ever removed or overwritten by a later revision; even after a proposal is approved and later revised again, all earlier versions remain visible. Both internal staff and the client can view the full history.

Change Requests

Once a project's proposal is **APPROVED**, the client may ask for additional work beyond the original scope (for example, an extra feature or deliverable). Rather than reopening and re-locking the entire proposal, this is handled with a separate **Change Request**:

1. **Raise a change request** (PM, AM, Admin, Super Admin) — from the project detail page, click + **New Change Request** and fill in a Title, optional Description, the **Additional Cost**, and optionally one or more new milestones (Name, Due Date, Amount).
2. **Client reviews** — the client sees the change request alongside any others on the project and can **Approve**, **Decline** (with a required reason), or **Request Revision** (with notes) — the same as the proposal workflow.
3. **On approval** — any milestones listed on the change request are created on the project automatically, and the project's Estimated Cost increases by the Additional Cost. The original approved proposal and its history are not affected.
4. **On decline or revision request** — the change request stays visible permanently with the client's response and note. To address the feedback, raise a new change request; the original is never edited or removed.

A project can have any number of change requests over its lifetime, and each one's full history — including declined or superseded attempts — remains visible.

Project Detail Page

Click any project name to open the detail page, which has four tabs:

1. **Work** — Manage milestones and tasks. Create/edit/delete milestones is limited to Super Admin, Admin, AM, and PM. Each milestone can carry a **Contracted Amount**, used to bill the client when marked complete (see Client Proposal Workflow above); the milestone's Name, Due Date, and Contracted Amount are all locked once the project's proposal is approved. Create/edit/delete tasks (and quick-cycling task status by clicking the status badge) is available to managers on any project, and to Team Members, Contractors, and Vendor Contacts only on projects they're assigned to. Also view the team members panel.
2. **Quotes** — Vendor quotes for the project (view, create, and manage; statuses: PENDING, SUBMITTED, APPROVED, REJECTED)
3. **Budget** — Budget tracking; create and manage budget line items
4. **Documents** — Upload and manage project documents

Access via **Tasks** in the sidebar (Internal + Vendor users only).

Viewing Tasks

Tasks can be viewed as a **Table** (with status filter tabs: **All**, **To Do**, **In Progress**, **Review**, **Done**) or as a **Board** (Kanban-style columns). Use the **Project** dropdown to filter by project. This view shows tasks across all projects regardless of assignment — browsing is unrestricted, but editing is scoped (see below).

Creating a Task

Click + **Create** and fill in:

Field	Required	Description
Name	Yes	Task name
Description	No	Task details
Status	No	TODO, IN_PROGRESS, REVIEW, DONE
Priority	No	LOW, MEDIUM, HIGH, URGENT
Project	Yes	Which project this task belongs to
Milestone	No	Associate with a project milestone
Assignee	No	User assigned to the task
Due Date	No	Task deadline
Estimated Hours	No	Time estimate
Is Billable	No	Toggle whether the task is billable

Project and Assignee options are scoped to your access: Super Admin/Admin/AM/PM see every project and can assign to anyone connected to the selected project. Team Member, Contractor, and Vendor Contact only see projects they're assigned to, and can only assign to people connected to that same project.

Quick Status Change

Click the status badge on any task to cycle through: **TODO** → **IN_PROGRESS** → **REVIEW** → **DONE** (Table view), or drag a card between columns (Board view). Only available if you can manage that task — editing, deleting, and status changes on tasks outside your assigned projects are disabled.

6

Time Tracking

Access via **Time Tracking** in the sidebar (Internal + Vendor users only).

Logging Time

The Time Log shows all your time entries. Click + **New Entry** to create one:

Field	Required	Description
Date	Yes	Date of work
Project	Yes	Project worked on
Task	No	Specific task
Description	No	What you worked on
Start Time	Yes	When you started
End Time	Yes	When you stopped
Duration	Auto	Calculated from start/end times
Billable	No	Whether this time is billable

Live Timer

Use the **Start Timer** button to track time in real-time. Click **Stop** when done — the start/end times will auto-populate the entry form.

Filters

Filter your time entries by **Project** or **Date range** (start and end dates).

Locked Entries

Time entries that are part of a submitted timesheet are locked and cannot be edited or deleted. They display a lock icon.

7

Timesheets

Access via **Timesheets** in the sidebar (Internal + Vendor users only).

My Timesheets

Create timesheets to bundle and submit your time entries for approval.

- 1 Click + **New Timesheet**
- 2 Select the **period start** and **period end** dates
- 3 The system automatically includes matching time entries
- 4 **Submit** the timesheet for approval, or save as draft

Timesheet Statuses

- **DRAFT** — Not yet submitted; can be edited or deleted
- **SUBMITTED** — Awaiting review; entries are locked
- **APPROVED** — Approved by a reviewer
- **REJECTED** — Rejected with a reason; review the feedback and resubmit

Click any timesheet to expand and see all linked time entries with hours.

Reviewing Timesheets (PM, AM, Admin, Super Admin)

The **Pending Review** section shows all submitted timesheets from team members.

- 1 Click a timesheet to expand and review the time entries
- 2 Click **Approve** to approve the timesheet
- 3 Click **Reject** and provide a reason to send it back

The **Approved Timesheets** section shows previously approved timesheets with total hours, billable hours, and who approved them.

Access via **Invoices** in the sidebar (Everyone).

Tabs

- **Client Invoices** — Invoices sent to clients (visible to Internal users and Clients)
- **Vendor Invoices** — Invoices from vendors (visible to Internal users and Vendors)

Use the **Status** filter to filter invoices by their current status.

Client Invoices

Creating a Client Invoice (PM, AM, Admin)

- 1 Click + **New Client Invoice**
- 2 Select the **Project** and **Client**
- 3 Add line items with Description, Quantity, Unit Price
- 4 Set tax rate and currency (auto-populated from client settings)
- 5 Save as Draft

Generating from Milestones (PM, AM, Admin)

For projects billed on a Milestone or Mixed basis, click ⚡ **Generate from Milestones**, select the project, and a draft invoice is created automatically with one line item per completed milestone, using each milestone's Contracted Amount. Milestones already billed to the client on a submitted, approved, or paid invoice are excluded from the count.

Invoice Lifecycle

DRAFT → SENT → APPROVED → PAID
└→ OVERDUE (if past due date)

- **DRAFT** — Can be edited and deleted
- **SENT** — Sent to the client for review

- **APPROVED** — Client or AM has approved the invoice
- **PAID** — Payment has been received
- **OVERDUE** — Past the due date without payment

Vendor Invoices

Creating a Vendor Invoice (Vendor Contact)

- 1 Click + **Create Invoice**
- 2 Select from approved quotes (auto-populates details)
- 3 Add line items
- 4 Save as Draft or Submit

Vendor Invoice Lifecycle

- **SUBMITTED** — Awaiting review by PM/AM
- **APPROVED** — PM/AM approved the invoice
- **REJECTED** — AM rejected the invoice (with notes)
- **REVISION_REQUESTED** — PM/AM requested changes; a new version is created for the vendor to edit and resubmit

A **review-queue banner** alerts PM/AM users when there are pending vendor invoices with count and total amount.

Invoice Detail Page

Click any invoice to view its full details: invoice header with status, dates, and amounts; line items table; payment history; and action buttons (Submit, Approve, Reject, Request Revision) based on your role and the invoice status.

Recording Payments

For approved invoices, authorized users can record payments:

- 1 Open the invoice detail page

2

Click **Record Payment**

3

Enter the payment amount and date

4

The invoice status updates to PAID when fully paid

Access via **Financials** in the sidebar (Admin, Super Admin, AM, PM only).

Summary Cards

Six cards provide a financial overview:

- **Draft** — Total value of draft invoices (pipeline)
- **Total Invoiced** — All invoices sent
- **Pending Review** — Invoices awaiting approval
- **Approved** — Approved invoice total
- **Paid** — Total payments received
- **Outstanding** — Unpaid balance

Project Breakdown Table

A detailed table shows financial data per project: project name and billing method, currency, invoice count, Draft / Invoiced / Pending / Approved / Paid / Outstanding amounts, a paid progress bar, and a totals footer row.

Filters

- **Vendor** — Filter by vendor organization
- **Client** — Filter by client organization

Access via **Reports** in the sidebar (Admin, Super Admin, AM, PM only).

Time Report Tab

- **Summary Cards:** Total Hours, Project Count, Entry Count
- **By-Project Breakdown:** Hours per project with percentage share bars
- **Entry Log Table:** Detailed time entries (up to 50 rows)
- **Filters:** Project dropdown, Date range (start/end)

Invoice Report Tab

- **Summary Cards:** Total Billed, Collected, Outstanding
- **By-Status Breakdown:** Invoice amounts grouped by status (Draft, Sent, Paid, Overdue)
- **Invoice Table:** Full list with collected and balance columns
- **Filters:** Client dropdown, Date range (start/end)

Access via **Admin** in the sidebar (Admin, Super Admin only). The Admin panel has three tabs:

Users Tab

Manage all user accounts in the system.

Creating a User

- 1 Click + **Create User**
- 2 Fill in: Name (required), Email (required), Password (required), Job Title
- 3 Select User Type: Internal, Vendor, or Client
- 4 If Vendor/Client: select the organization
- 5 Toggle role assignments (multiple roles can be assigned)
- 6 Set Active/Inactive status

Available Roles: Super Admin, Admin, Account Manager, Project Manager, Team Member, Contractor, Vendor Contact, Client

User Table displays: Name & Title, Email, Company badge (Internal/Vendor/Client), Role pills, Active status.

Clients Tab

Manage client organizations.

Field	Notes
Name	Required
Contact Email	
Contact Phone	
Address	
Payment Terms	Default: "Net 30"
Currency	Dropdown
Active / Inactive	Status toggle

Vendors Tab

Manage vendor organizations.

Field	Notes
Name	Required
Contact Email	
Phone	
Address	
Default Hourly Rate	Displayed as "\$X/hr"
Currency	
Active / Inactive	Status toggle

Click **Edit profile** in the sidebar footer, or navigate to **Profile**.

Editable Fields

- **Name** — Your display name
- **Email** — Your email address (disabled for Google OAuth users)
- **Job Title** — Your job title

Read-Only Information

- **User Type** badge (Internal, Vendor, or Client)
- **Company Name** (for Vendor/Client users)
- **Auth Provider** badge (Local or Google)
- **Roles** — Your assigned role badges

Changing Password (Local accounts only)

- 1 Enter your **Current Password**
- 2 Enter your **New Password** (minimum 8 characters)
- 3 **Confirm** the new password
- 4 Click **Update Password**

Google OAuth users cannot change their password and do not see this section.

PM Tool supports three languages. Switch using the buttons in the top-right corner of the header — your selection is applied immediately across the entire application.

Button	Language
EN	English
简	Simplified Chinese (zh-CN)
繁	Traditional Chinese (zh-TW)
